**The Illustration:**

- When I thought of the word stealth, I thought of a game I used to play called elder scrolls. The more you did certain skills, you would level up in them. And one of the things I loved to do in the game was pickpocket certain people. And when I did that my 'stealth' skill would level up. But, in order to pickpocket people, you almost had to be in the shadows; a mysterious figure stealing the riches of citizens. So, I picked the word 'mysterious'. I immediately thought of hidden figures and deep shadows. So, I took a UV flashlight and angled it directly over my head, creating a deep shadow that masks my face, masks my identity.
